

**WHAT IS DREAM?**

DREAM is a state digital restoration ecosystem that creates a single digital route for all restoration projects and ensures their transparent and efficient implementation at the national, subnational and local levels. DREAM is a "single window" for working with restoration and development projects. Business processes and project preparation and implementation methodologies are based on the relevant principles of International Financial Institutions (IFIs) and elements of European Structural Funds. Project development is based on the principles of inclusion, energy efficiency, environmental standards and approaches of the New European Bauhaus.

⚡ *DREAM included in the Ukraine Facility Plan approved by the Cabinet of Ministers of Ukraine*

⚡ *DREAM included in the roadmap for public investment management reform approved by the Cabinet of Ministers of Ukraine*

**DREAM: OPPORTUNITIES FOR BUSINESSES**

**ACCESS TO PARTICIPATION IN RECOVERY PROJECTS**

Opportunity to involve businesses in restoration - both as an investor and as a contractor in thousands of recovery projects.

**PREDICTABILITY AND PLANNING**

Open data at every stage of project preparation and implementation allows businesses to plan their participation in restoration and their own development. The availability of information on funding sources reduces business risks.

**HIGH STANDARDS OF DOING BUSINESS**

International data framework, clear procedures, and unified standards for filling out information and implementing projects in DREAM ensure a high level of partnership with businesses.

**DATA-DRIVEN SOLUTIONS**

The DREAM analytical module presents aggregated data on restoration projects in easy-to-use dashboards. Data is collected at every stage of the project life cycle and serves as the basis for effective management decisions.

**DREAM STATISTICS**

**5346** projects    **UAH 280.16 billion** total projects' budget

**UAH 52.29 billion** of confirmed funding

**1145** communities

**5** Ministries and Agency for Restoration

**5** recovery partner countries

*\*according to the analytics module [bidream.gov.ua](http://bidream.gov.ua) as of 10.07.2024*

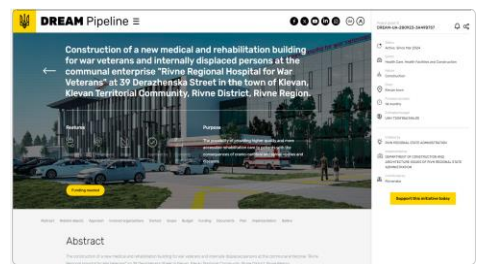

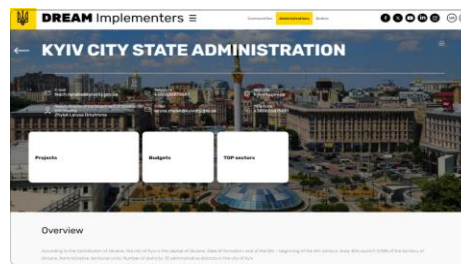

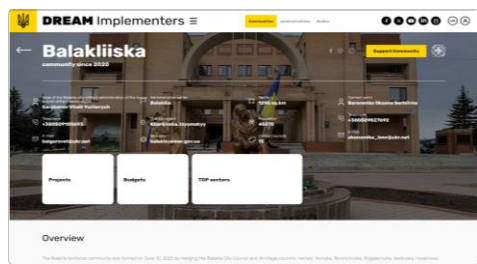

**IN THE BUSINESS OPPORTUNITIES SECTION ON THE DREAM.GOV.UA PUBLIC PORTAL YOU CAN FIND AVAILABLE TENDERS AT DIFFERENT STAGES OF PROJECT IMPLEMENTATION**

**PROFILE OF THE COMMUNITY AS THE MAIN INITIATOR OF PROJECTS**

**INVESTMENT PROFILE OF THE GOVERNING BODIES**

**DETAILED INFORMATION ON EACH PROJECT**

**DREAM IMPLEMENTATION PROGRESS**

**Project Pipeline in DREAM**

All initiated projects are included in a single register (Pipeline), where they compete with other projects for the opportunity to be financed and implemented. The ecosystem allows the user to select and monitor projects using filters by region, sector of the economy, status, initiator, donor, etc., as well as to create a personalised list of projects adjusted to specific needs and interests. The availability of information about the project customer allows businesses to contact communities directly.

**Analytics, control, reporting**

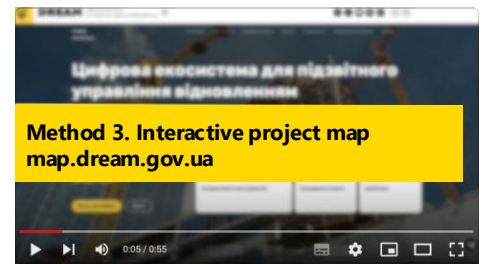

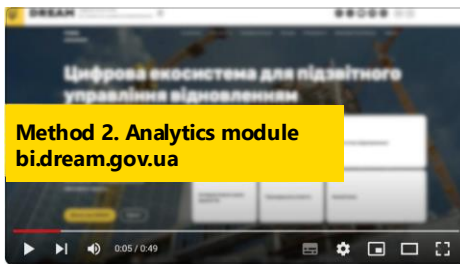

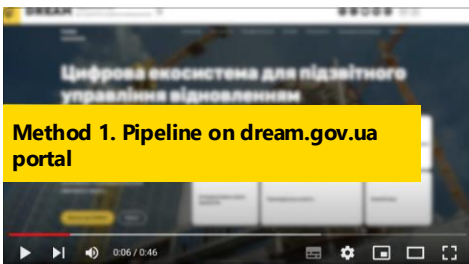

Integration of DREAM with 9 state registers allows for end-to-end data monitoring, and brings all information into a "single window", thus increasing its reliability:

- The business intelligence module provides comprehensive information on the total number of projects by region, district, and community, planned budget, confirmed funding, as well as more useful data in user-friendly dashboards.
- Interactive DREAM map allows for a quick overview of all projects.
- Open data in accordance with global standards (OCDS) is available via an open API.

**PROJECT PIPELINE**

**ANALYTICS MODULE**

**DREAM MAP**

A separate profile "Financial Programs" is available in the menu tab on the main page of dream.gov.ua. It will contain information on available IFI programs, as well as budget or donor programs. Businesses can track funded projects, find out the reason for the refusal of funding, etc.

Currently, this block contains the following:

- Information on the distribution of UAH 2.5 billion of subvention for shelters and catering units, initiated by the Ministry of Education and Science of Ukraine
- A separate list of projects created within the framework of the financial program, with the possibility to filter them by various parameters and access detailed information

**HOW TO SUPPORT A PROJECT IN DREAM**

- Click the "Support the project now" button on the page of the selected project and fill out the feedback form
- Directly contact the community that initiated the project (contact details can be found in the community investment profile)
- Send email to [info@dream-office.org](mailto:info@dream-office.org) with your request

The successful experience of selecting projects under the subvention for the arrangement of shelters and catering units will be a use case to implement other financial programs using the DREAM ecosystem
